

# Why Choose Us?

## Consultation

Pentagon Play has worked with over **6,000** schools and bring over **20 years of experience** in educational play to every consultation. We take time to listen and understand what you and your children want to gain from their play experience. Our consultants regularly attend school council meetings to gain invaluable input from children when designing their dream play environment.

## Bespoke

What sets us apart from the rest is the fact that we recognise that **every school is different**. We cater for customer's bespoke needs, whilst developing their play areas. Our enthusiasm for learning and play means we always 'go the extra mile' to create something unique. If you have your own product idea, or just wish that one of our standard products was a little bit different, we **have the knowledge and expertise** to make this happen.

## Design

We'll **design it, draw it and communicate** our proposals clearly with you. This is when the project begins to take shape. Our consultants and designers will combine their expertise to bring your new play area to life. We'll give you a clear view of what your future playground will look like through plans and 3D drawings.

## Installation

Our installation teams have **successfully completed thousands of installations** in schools. Our teams' experience allows for a smooth installation process with **minimal disruption**, recognising the need to operate in a safe and secure manner. All of our staff hold **CRB/DBS** certificates so that you can be assured of your children's safeguarding. We're committed to protecting the environment by **minimising waste, re-cycling** and using **responsibly sourced** materials.

## Care

Owing to our friendly and well-informed approach, we have built long-lasting relationships with schools across the country. We are a **trusted supplier** and regularly receive **glowing testimonials** about our expert service and aftercare. This is one of the main reasons why the majority of our work comes from existing customers and referrals. After installation, we will **provide your teachers with lesson plans** for each of our products and **conduct teacher training** days to help inspire new ideas when teaching outdoors.

# A Trusted Provider

Pentagon  
For Learning and Play

We take our safety obligations seriously. We work closely with industry recognised safety experts when we design our playground products. Our structural engineers produce calculations for our structures to ensure that they will withstand the worst of British weather. All our playground equipment is certified as compliant with the European Playground Safety standard EN1176.

## DBS checks ✓

All our staff hold certificates issued by the Disclosure and Barring Service (Formerly CRB checks)

## Constructionline accredited ✓

All our systems of work and Health and Safety policies have been reviewed and passed by this public sector recognised organisation.

## EN1176 compliant ✓

Our products have been approved by RPII registered inspectors for compliance with the European playground standard.

## EN1177 compliant ✓

Our safety surfaces have been tested by an approved testing house for compliance with the European playground standard.

## RoSPA ✓

We work closely with RoSPA to ensure our ongoing designs and processes comply with the ever changing H&S legislation.

## Building regulations ✓

All of our timber structures have been approved by structural engineers for compliance with statutory building regulations. Calculations are available on request.

## Pentagon's Price Promise

We believe we offer the best value playground products in the marketplace; if you can show us a valid 'like for like' quote, we promise to match or better this price!

installation.

**Outdoor  
Classroom**  
Activities

Children love being and learning outdoors, no matter what the weather. They love the flexibility freedom gained from being able to move freely inside and outside during the day and not being confined to a classroom. They are much more inclined to create and become immersed in their own activities and projects when they are outdoors. This brings many psychological benefits to children, feelings of happiness and enjoyment, and a better learning environment.

**Water Wall**

Activities

It's time to bring water play and investigative learning to your EYFS, KS1 or KS2 outdoor learning environment. Pump the water from the bottom reservoir to the top, once the rain cloud reaches capacity watch it rain into the adjacent slide water channels, via gravity, along whatever route your children have envisioned!

The wall is a great aid to the teaching of science and the water cycle, the source to the mouth of a river, water recycling, kinetic energy, flow and gravity, balance and equilibrium, mass and weight of materials (water and plastic). In addition, it challenges key skills in problem solving, teamwork, communication and encourages higher-level thinking. It's fantastically fun too - the cloud can pour enough water for the whole wall to be splashing and tipping for 2 minutes or more! Now with the 'cloud' and ratchet pump there can be 360° of play as the wall is both-sided. The brackets allow 90° angles out from the wall to enable other items to be connected to the wall, extending play into another area.

**Mud**

Our Mud Kitchen is a place for children to explore and experiment with mud. It's the perfect place for messy play, and it can be used for many other activities. It will reward a lot of your children in the same way as...
