

Active Play: Harter Fell Climber

A triangular log climbing frame that offers children flexible routes, several crossing points and multiple ways to climb and traverse.

The design is non-prescriptive, allowing children to play in ways they imagine and climb at their own pace. There is no obvious way for the children to enter the challenge, making it open-ended and exciting for the children.

Using a pyramid shape, children will be given more room and access for den-making activities. While overcoming this challenge, children will build their climbing confidence, upper and lower body strength, core stability, balance and gross motor skills.

Technical Details:

- Size (L x W x H): 2865mm x 2815mm x 2800mm
- Critical fall height: 0.9M
- Overall size including fall space: 5.8M x 5.8M
- Minimum safety surfacing required: 25M²
- High pressure treated 'play grade' timber
- Steel reinforced, nylon ropes
