

Active Play: Bodiam

Modular Play Tower

Our Bodiam Modular Playground Tower encourages children to climb, run, build dens, act out favourite stories through role play, build confidence and conquer fears through safe risk taking.

With multiple challenges varying in difficulty, children with mixed abilities will begin to encourage children who are struggling and show them the skills to overcome certain obstacles. This will not only see a fantastic improvement in children's physical skills but also in their communication, language and social development.

The Bodiam Tower includes climbing and traversing challenges to build upper body strength, coordination, balance and fine motor skills through grip and grasp. It also includes a timber bridge for children to run across and participate in fun imaginative games.

Technical Details:

- Size (L x W x H): 8245mm x 7055mm x 2645mm
- Critical fall height: 1.5M
- Surfacing Required: 74.5M²
- High pressure treated 'play grade' timber
- HDPE plastic slide
- HDPE plastic slide entry panel
- Polyurethane climbing holds
- Steel reinforced Nylon ropes
