

# Active Play: Framlingham

Modular Play Tower

The Framlingham Modular Play Tower is our largest modular design with challenges ideal for Key Stage 1 and Key Stage 2 children.

This massive tower is brimming with exciting challenges that will develop children's physical and fine motor skills. For example, the large climbing wall will develop children's upper body strength and grip and grasp while the Net Traverse will help to improve core stability and coordination.

Children can challenge themselves or work in teams to overcome the obstacles and learn how to share ideas to tackle them. This will boost their communication and language as they learn the importance of sharing knowledge and helping others that may be struggling.

We developed high difficulty areas suited for Key Stage 2 children and less challenging items suited for Key Stage 1. This creates an excellent atmosphere where both groups of children can play alongside one another to ensure they have continual development and progress skills further.

## Technical Details:

- Size (L x W x H): 12785mm x 50600mm x 3690mm
- Critical fall height: 1,2M
- Surfacing Required: 113M<sup>2</sup>
- High pressure treated 'play grade' timber
- Tongue and groove log clad roofs
- Galvanised and powder coated steel components
- HDPE plastic slide and Tunnel
- Polyurethane climbing holds
- Steel reinforced Nylon ropes
