

# User Guide - Water Wall

We want you to get the most out of your new playground equipment. We've compiled a few, simple notes to help proper use and maintenance of the equipment. As with all playground equipment, your own risk assessment is required as part of your school processes. Here are the key points:

- This is an educational item and must be used under teacher supervision only
- This is to be used with water! So please ensure all water is drained after each use
- All parts are freely configurable and movable for your children to create their own 'flows'. This also enables them to be removed easily and stored away when not in use
- If supplied with a hose connection, your hose connects with a simple hozelock fitting to the male hose connector at the bottom of the post. We've supplied a spare hozelock fitting in case your hose doesn't have one (or as a spare). Make sure your hose travels across the playground in the safest way possible in accordance with your own risk assessment, and tidy it away after use
- Please clean weekly with a mild disinfectant spray
- Visually inspect your product, making sure no timbers are splitting and no fixings are loose and in accordance with your Pentagon Maintenance Manual

For more detailed maintenance information please refer to you Pentagon Maintenance Manual
