

# Imaginative & Creative: Gravity Table

Fine motor skills are so important for school readiness and the confidence that comes with feelings of independence. These ramped surfaces are perfect for developing coordination in small hand muscles and supporting inclusive child-led play.

There are lots of possibilities with this open ended resource. Whether your children are taking their turn pouring a jug of water at the top of the steps, to observing the results at the bottom and being inspired to try something of their own. Your little ones will be fascinated by each differing result as water and loose resources bounce and roll down the surfaces at different speeds, sparking excited conversation and questioning. Expand on this learning by using sand or other materials to slow or direct the descent of objects. You could create a pathed sand run as part of your setup, or just leave them to experiment in creating their own ball or water runs. Whether that is by happy accident, or through imaginative thought and group activity. The drip tray provides a container for all your resources to return to, with holes provided to prevent standing water.

## Technical Details:

- Size (L x W x H): 1844mm x 772mm x 837mm
- 'Play grade' high pressure treated timber frame
- 8mm PETG Sheet
- 120mm Polypropylene Drip Tray
- 2 x Wheels
- Includes Grass-Topped Steps
