

## Imaginative & Creative: Forest Floor Learning Den with Window and Bench

Complete with a beautifully crafted double pitch roof from top to bottom and fun in-built windows, our unique Forest Floor Learning Den is an excellent open-ended resource that presents plenty of outdoor learning opportunities.

As this structure is possibly unforeseen by many of the children, it will bring fascination and curiosity to your outdoor setting, unleashing the inner imaginative and creative sparkle in any child.

The covered deck space, at a raised level, is ideal for den building and role-play games as children climb the full-width steps onto the spacious deck. Once inside the playhouse, a large polycarbonate window on the side of the den allows plenty of natural light to shine through as the little learners look down on the playground below.

Adult led activities can be taken outdoors as the deck provides enough space for teachers to lead storytime and a full class of children to sit inside, allowing their imaginations to run wild as the story comes to life!

Den making holes at the front of the playhouse enable children to dress the space how they wish, hanging props and signs to enhance their games or providing teachers with the opportunity to lead the play with adult-led learning activities.

Learning at height in the great outdoors provides plenty of positive outcomes: improving children's behaviour, increasing self-esteem, developing problem-solving skills and independence. Moreover, the fascinating structure engages children in learning through play, boosting social competence and developing their language skills.

### Technical Details:

- Size (L x W x H): 2529mm x 2125mm x 2305mm
- Bench Height Size: 375mm
- 'Play grade' sanded high-pressure treated timber
- Clear PETG window
- Full width stairs at the front
- Diagonally clad panel at the back
