

## Active Play: Platform to Platform Beam Crossing

For all those wonderfully energetic children out there who prefer to perform their own stunts - here's another one for them!

A fail-safe for all-round physical development, the Platform to Platform Beam Crossing features a rounded timber balance beam, suspended between spacious platforms at both ends.

Each platform is covered with our textured, all-weather Artificial Grass - designed to provide a soft, safe landing surface after they've stepped, tip-toed, run, jumped, shimmied or even - dare we say it - pirouetted their way across the beam!

Three reinforced ropes hang down from an overhead grip-rope, offering children firm but flexible grip options to help maintain their balance.

### Technical Details:

- Size (L x W x H): 3440mm x 725mm x 1900mm
- Critical fall height: <0.6M
- Overall size including fall space: 6440mm x 3725mm
- Minimum area required\*: 20.4M<sup>2</sup>
