

Active Play: Wobbly Log Traverse

A magical 'floating' timber log suspended on reinforced ropes that hang from the surrounding timber frame - the Wobbly Log Traverse is ready and waiting for adrenaline-fuelled imaginary adventures!

Racing down a forest ravine on a wayward canoe, or crossing crocodile-infested waters on a jungle safari, children can sit and stand, swing, step, hop and weave across the log using the ropes for balance and support.

This traverse is a fabulously fun play resource for vestibular development, helping to improve balance, coordination and motor skills, and developing overall physical strength and stability.

Technical Details:

- Size (L x W x H): 2910mm x 150mm x 2630mm
- Critical fall height: <0.5M
- Overall size including fall space: 5750mm x 3150mm
- Minimum area required*: 16M²
- High pressure treated 'play grade' timber
- Steel reinforced rope
